compatibility.

L-1020 *Plus*

INTRODUCING
LUXURY PERFORMANCE
IN ECONOMY SIZE

L I G H T W A R E

From the experts in portable, affordable LCD projectors comes our highest-performance presentation tool yet, the spectacular L-1020*Plus*. Now your graphics will pop like never before thanks to the true XGA high-resolution display. The L-1020*Plus* has a high-intensity lamp that produces 700 lumens, enough to light a small village — or at least a really big boardroom. And it's got all the other bells and whistles you need to pull off a truly dazzling presentation, like electronic image zoom, VCR jacks and interface logic engineering that allows it to recognize the current video signal and make the appropriate picture-quality adjustments. All this and it's still portable enough to take just about anywhere.

Not sold yet? The L-1020*Plus* can also store up to five different display settings, so you don't have to reconfigure the display every time you connect to a different computer. And now, Lightware's high-performance projector is compatible with your High-Definition TV.

It's hard to believe you can have the best of all worlds — powerful yet lightweight, full-featured yet affordable. To find out more about the Lightware L-1020*Plus*, call us at 1-800-211-9001.
