

Scout XL

Lightware has always set the standard for price, performance and portability. With the Scout XL, Lightware has designed a powerful, ultraportable projector that raises the standard for multimedia projection. Generating sharp images with corner-to-corner brightness, the Scout XL is truly the best value in the market today.

Designed for even the brightest lighting conditions, Scout XL provides VGA through XGA (native SVGA) resolution to project video, data and graphics with sharp contrast and dramatic image quality in a truly compact design.

The Scout XL weighs only 5.2 pounds and uses a single panel, full color 1.6 inch polysilicon LCD light engine and 150-watt lamp to generate 700 lumens. With the new one-touch auto setup button that automatically configures the picture, the Scout XL is also the easiest projector to plug, play and project.

**Ultraportable
At just 5.2 lbs.**

**One touch
auto setup**

**700 ANSI lumens
corner-to-corner
brightness**

**Connects to virtually
any video source**

**Automatic video
sensing electronics**

**Built-in control panel
and remote control**

**Try before
You buy program**
