**Zoom and focus
adjustment**

**Projects a
brilliant picture,
delivering sharp,
crisp images
every time.**

For Education, Multimedia & Presentations

Be assured of spectacular presentations with the Microtek LCD MVP800x multimedia projector. This is the ideal projector for your needs, whether for a lecture in a school auditorium or at a major corporate meeting.

Your audience will appreciate the extremely realistic and dazzling images due to the XGA1,024 x 768 true resolution with 24.7 million colors.

Added to this are dual 3-watt stereo speakers that provide clear, dramatic sounds much greater than typical mono speaker designs. The 1.3x zoom and focus allow presenters to create images from 30" to 127" (diagonal). Regardless of ambient lighting, the 650 ANSI lumens create tremendous brightness and clarity with or without lights. And with the wireless remote, which includes the built-in laser pointer, presenters are encouraged to move freely around the room maintaining control over the projector and remote mouse function.

With little more to do than plug it in and turn it on, the MVP800x was designed to be uncomplicated and easy to operate. Master your presentations; choose the Microtek MVP800x projector.
