

Acer PD1530i

ACER PD1530i

A brief introduction to the Acer PD1530i. The standard portable DLP LED projector has an HDTV 1920 x 1080 resolution and a contrast of 2000000:1. The manufacturer states an LED service life of 20000 hours, which converts to over 13.7 years at 4 hours of operation. The built-in ambient light sensor detects the ambient light in the room and automatically optimizes the image. The projector is equipped with an integrated media player, so direct playback of files will not be a problem. As the projector has horizontal and vertical keystone correction, the projector can be set up with plenty of free space in the room. An image width of up to 556 cm is possible as the projector has 3000 Ansi lumens. However, if there is room light, the picture should be a maximum of 371 cm wide. Playing 1080P and 4K (compressed) is also no problem for the projector, which can even project Blu-rays onto the ceiling thanks to 360° projection. With only 30 decibels of operating noise, the model is already very quiet compared to others.

Brief Introduction Beta 2.5
