

Boldever H1

BOLDEVER H1

With the H1, manufacturer Boldever offers an LCD LED projector with HDTV 1920 x 1080 resolution. Boldever states a lifespan of 30,000 hours, which equates to over 20. 5 years if used for 4 hours a day. Horizontal and vertical keystone correction ensures that setting up the image is child's play. An image width of up to 477 cm is possible, as the projector has 1,500 ANSI lumens. However, if there is ambient light in the room, the image should be no more than 318 cm wide. Thanks to Google TV, the projector can be conveniently controlled via voice commands. As the projector recognises Chromecast, AirPlay and Miracast screen mirroring signals, it is possible to play videos directly from a smartphone, tablet or PC (Android, Windows and iOS) via Wi-Fi in high resolution and with surround sound. Another bonus worth mentioning is that the projector's Bluetooth function allows it to be connected to external wireless speakers. The model is also compatible with Full HD 1080p and 4K (compressed). Compared to other projectors, it is very quiet, with an operating noise level of 30 decibels.
