

Brookstone Prima Ultra Portable Pico Projector

Brief Introduction

Beta 2.5

A brief introduction to the Prima Ultra Portable Pico Projector: The Brookstone game portable LED projector offers 200 Ansi lumens and a VGA 640 x 480 resolution. Thanks to the LEDs, the projector has a light life of up to 20,000 hours, which is over 13.7 years with a daily viewing time of 4 hours. Horizontal and vertical keystone correction makes setting up the picture childs play. The projector can illuminate a picture width of 123 cm well. However, if room light is available, the picture width should ideally not exceed 82 cm. In addition, thanks to the Bluetooth function, the projector can be flexibly paired with other speakers. Playing 1080P is also no problem for the projector. The model was built by Brookstone in 2012 and is no longer current, but is still very popular in our projector database.
