Illumination

A brief introduction to the PicoBit: The Celluon Game-Portabel DLP projector offers 63 Ansi lumens, a contrast of 80000:1 and an HDTV 1920 x 720 resolution. The projector can illuminate a picture width of up to 81 cm well thanks to the 63 Ansi lumens. In room light, however, the image width should ideally be less than 54 cm. The rechargeable projector is not dependent on a direct power source and can therefore be set up very quickly, freely and spontaneously. This model is no longer offered by Celluon.
