

Christie Mirage HD8

CHRISTIE MIRAGE HD8

The Christie Mirage HD8 model is a DLP projector with HDTV 1920 x 1080 resolution and a contrast of 1500-2000:1. The integrated lens shift gives freedom when positioning the projector. Thanks to the brightness of 8000 Ansi lumens, a picture width of 909 cm is possible. The projector can also handle slightly brighter rooms with a smaller image width (we recommend max. 606 cm). If the image width is not sufficient, the projector offers integrated edge blending software, which allows several projectors to project a large image together. Even 1080P playback is no problem for the projector. The model built in 2008 is no longer offered by Christie. Unfortunately, we can no longer offer a replacement lamp for this model, neither original nor replica.

Brief Introduction

Display Type

 3 x 0,95" DC3 DLP Chip
HDTV 16/9 Ti Digital Light Processing Chip
