

Christie Mirage S+12K

CHRISTIE MIRAGE S+12K

Brief Introduction

Beta 2.5

With the Mirage S+12K, manufacturer Christie offers a large-format DLP projector with SXGA+ 1400 x 1050 resolution and a contrast of 2000:1. With the lens shift function, the projector can be positioned very freely. 954 cm image width, the projector will be able to illuminate well. Rooms with residual light can be created by the projector with a smaller image width, we recommend a maximum of 636 cm. If the image is still too small, the integrated edge blending software can help to project a larger image with additional projectors. Even 1080P video signals are no problem for the projector. It was launched in 2008 and is no longer offered by the manufacturer Christie. It should also be noted that there are unfortunately no longer any replacement lamps available for the projector, neither originals nor replicas.
