

Christie Mirage S+16K

CHRISTIE MIRAGE S+16K

Brief Introduction

Beta 2.5

The large-screen Mirage S+16K 3D DLP has 16000 Ansi lumens, a contrast of 2000:1 and an SXGA+ 1400 x 1050 resolution. The built-in lens shift function provides freedom in projection adjustment. An image width of up to 1102 cm is possible, if the image width is smaller (we recommend max. 735 cm), rooms with residual light are also no problem. If the image is still too small, the integrated edge blending software can help to project a large image with additional projectors. The projector can also play 1080P without any problems. It was launched in 2008 and is no longer offered by the manufacturer Christie. It should also be noted that there are unfortunately no longer any replacement lamps available for the projector, neither originals nor replicas.

Display Type

3 x 0,95" DC3 DLP Chip
