

# Christie Roadster HD14K-M

CHRISTIE ROADSTER HD14K-M

The Christie Roadster HD14K-M large screen 3D DLP projector has 12000 Ansi lumens, a contrast of 2500:1 and a HDTV 1920 x 1080 resolution. The built-in lens shift function provides freedom when setting up. An image width of up to 1113 cm is possible as the projector has 12000 Ansi lumens. The projector creates rooms with residual light with a smaller image width, max. 742 cm is recommended. In the event that the image is still too small, the projector offers integrated edge blending software, which allows several projectors to project a large image together. The model is also Full HD 1080P and 3D compatible. The projector was launched in 2012 and is no longer sold by the manufacturer, but is still a popular projector in our database.

3 x 0,95" DLP Chip  
HDTV 16/9 Ti Digital Light Processing Chip
