- +/- 60% vertical, +/- 30% horizontal Lens shift
- Zoom 1.5x (1.75-2.53:1 throw ratio)
- 2x HDMI 1.3 inputs
- Compatible with the 2.35 Theatre Concept Kit
- Silent working noise (< 20 dB)
- Designed in Paris, France

Product Overview

| Designed in France

Antoine Béon, creator of the Blackwing Line, wanted the Blackwing One to celebrate the idea of speed and precision with this unforgettable futuristic shape. From which the name, BlackWing.

| Luxurious Material

The chassis made in ABS-PC, a material also used in the car industry, is a valour in itself. Beyond its extreme resistance to shocks, it also absorbs heat and noise, reducing the working noise level of BlackWing One to 20 dB.

Last touch, the car paint gives BlackWing One a luxurious and elegant finish. A different colour finish can be made upon demand.

| Installation Versatility

BlackWing One is extremely easy to install. The 1.5x zoom (1.75-2.53:1 throw ratio) and the high brightness make it compatible with any kind of room. The vertical and horizontal lens shift capability can address any challenging configuration. Besides, with the keystone correction, it is a child's play to adjust the projector for the most razor-sharp picture.

| Cinema-like Performance

The association of the full-glass Ultimate Reference Lens with a 3 chips L-COS 1080p Full-HD engine (15,000:1 contrast ratio) gives the best out of any picture. The internal HQV video-processor enhances the input signal quality and removes video noise.

| Extreme Attention to Details

Every single unit is carefully tested and individually calibrated by our 20-years experienced video engineer. The colour temperature (in the respect of D65) and the white field uniformity are optimized to provide a very natural and CRT-like picture quality.

| A dedicated Cineversum Network

The BlackWing one is distributed and installed through a network of experienced, skilled and carefully selected Cineversum authorized dealers and custom installers. The guarantee of a real tailor-made approach.

Cineversum Home Theatre Concept - the Options

Cinemax Kit

Cinemax Kit

A permanent cinemascope solution for the Blackwing One. Just put it in front of the projector and the switch from 16:9 to cinemascope is as easy as pressing a key on the remote control.

Theatre Kit

THEATRE Concept Kit

Enjoy watching Cinemascope movies in their genuine 2.35 format thanks to Cineversum's first-grade anamorphic lens and proprietary motorized sliding system. Easy to adapt with BlackWing One.
