The Blackwing 2 Laser MK2024 3D Laser LCOS has 2500 Ansi-Lumen, a contrast of 80000:1 and a UHD (4K+2K) 4096 x 2160 resolution. The manufacturer specifies a laser service life of 20000 hours, which converts to over 13.7 years at 4 hours per day. The projector also offers a lens shift function for flexible projection adjustment without loss of quality. The projector can illuminate an image width of up to 249 cm thanks to its 2500 Ansi lumens. In room light, however, the image width should ideally be less than 166 cm. The model is also compatible with Full HD 1080P and 4K as well as 3D, meaning that all Blu-ray formats currently available can be recognized by the projector.
