

CineVersum LV-WU65K Laser ST

CINEVERSUM LV-WU65K LASER ST

Brief Introduction

Beta 2.5

The stationary CineVersum LV-WU65K Laser ST 3D Laser DLP projector has 5100 Ansi lumens, a contrast of 1800:1 and a WUXGA 1920 x 1200 resolution. Thanks to the laser technology, the projector has a light life of up to 20000 hours, which is over 13.7 years if enjoyed for four hours a day. The integrated lens shift provides freedom when positioning the projector. The projector is equipped with a microphone jack plug and 10W speakers, so no additional speakers are required for presentations or training sessions. An image width of up to 726 cm is possible as the projector has 5100 Ansi lumens. The projector can create rooms with residual light with a smaller image width, max. 484 cm is recommended. If the image width is not sufficient, the projector offers integrated edge blending software, which allows several projectors to project a large image together. The HDMI MHL (Mobile High-Definition Link) port allows 1080p / 60 Hz image mirroring (screen mirroring) to be transmitted from a smartphone while it is being charged at the same time via the connection. It is also Full HD 1080P and 3D compatible. The model was built by CineVersum in 2019 and is no longer current.

 1 x 0,67" DLP Chip
WUXGA 16/9 Ti Digital Light Processing Chip

Display Type

Ansi-Lumen

5100
