

Digital Projection HIGHlite 10000HD

Brief Introduction

Beta 2.5

The HIGHlite 10000HD DLP has 10000 Ansi lumens, a contrast of 2000:1 and HD2K 2048 x 1080 resolution. The integrated media player allows files to be played directly. The built-in lens shift function provides freedom when setting up. 871 cm picture width, the projector will be able to illuminate well. Rooms with residual light can be created by the projector with a smaller image width, we recommend a maximum of 581 cm. If the image width is not sufficient, the projector offers integrated edge blending software, which allows several projectors to project a large image together. The model built in 2005 is no longer offered by Digital Projection, but is still very popular in our projector database. It should also be noted that there are unfortunately no longer any replacement lamps available for this projector, neither originals nor replicas.

3 x 1,26" DC3 DLP Chip
HD2K 4/3 Ti Digital Light Processing Chip

Display Type

Ansi-Lumen

10000

Contrast

2000:1 full on/off
