

Digital Projection TITAN 1080p Quad 2000 3D

The large-screen Digital Projection TITAN 1080p Quad 2000 3D DLP projector has 20000 Ansi lumens, a contrast of 2000:1 and an HDTV 1920 x 1080 resolution. Includes a lens shift function, which provides freedom during installation. The projector can illuminate an image width of up to 1437 cm thanks to its 20000 Ansi lumens. The projector can create rooms with residual light with a smaller image width, we recommend a maximum of 958 cm. If the image is still too small, the integrated edge blending software can help to project a larger image with additional projectors. The projector can also play 1080P and 3D without any problems. The projector was launched in 2013 and is no longer sold by the manufacturer, but is still a very popular projector.
