

EGJSG N1

A brief introduction to the EGJSG N1. The portable game LCD LED projector has an HDTV 1280 x 720 resolution and a contrast of 5000:1. The manufacturer specifies an LED lifespan of 60,000 hours, which would be the equivalent of 41.1 years at 4 hours a day. Including an integrated media player that can be used to play files directly. At 305 cm wide, the projector will be able to illuminate well. However, if room lighting is available, the image width should ideally not exceed 203 cm. Since the projector recognises Airplay, Miracast Screen Mirroring signals, it is possible to play videos with high resolution and surround sound directly from a smartphone, tablet, PC (Android, Windows and iOS) via WLAN. In addition, thanks to the Bluetooth function, the projector can be flexibly connected to other speakers. The model is also Full HD 1080P compatible.

Brief Introduction Beta 2.5

Display Type

- 1 x LCD TFT Panel
- HDTV 16/9 Liquid Crystal Display
