

Epson EB-L550U

EPSON EB-L550U

The Epson EB-L550U 3D laser LCD projector has 5200 Ansi lumens, a contrast of 25000000:1 and a WUXGA 1920 x 1200 resolution. The lifespan is 20000 hours due to the laser, which would be the equivalent of over 13.7 years at 4 hours per day. The projector also offers an integrated media player that can be used to play files directly. With the lens shift function, the projector can be positioned very freely. The projector can illuminate a picture width of 733 cm well. Rooms with residual light can be created by the projector with a smaller image width, we recommend a maximum of 489 cm. In the event that the image is still too small, the projector offers integrated edge blending software, which allows several projectors to project a large image together. Playback of 1080P and 4K (compressed) as well as 3D is also no problem for the projector, meaning that all Blu-ray formats currently on offer can be recognized by the projector.
