The Beam J2 LED DLP has 300 Ansi-Lumen, a contrast of 5000:1 and a WVGA 854 x 480 resolution. It is an LED projector with 20000 hours of light life, which is the equivalent of over 13.7 years at 4 hours per day. The projector can illuminate a picture width of up to 176 cm well thanks to the 300 Ansi lumens. In room light, however, the image width should ideally be less than 117 cm. Thanks to the built-in 9000 mAh battery, no power supply is required, allowing the projector to be set up quickly and flexibly. As the projector recognizes DLNA, Airplay, Miracast Screen Mirroring signals, it is possible to play videos with a high resolution and surround sound directly from a smartphone, tablet, PC (Android, Windows and iOS) via WLAN. It is also Full HD 1080P compatible. The model was built by EZCast 2020 and is no longer current.
