

Favi pico+

FAVI PICO+

Brief Introduction

Beta 2.5

A brief introduction to the Favi pico+. The game-portable DLP projector has a WVGA 858 x 484 resolution and 85 Ansi lumens. The manufacturer specifies a lamp life of 20000 hours, which converts to over 27.4 years at 2 hours per day. The projector can illuminate a picture width of up to 94 cm well thanks to the 85 Ansi lumens. In room light, however, the picture width should ideally be less than 63 cm. With the HDMI MHL port, the smartphone image can be transmitted to the projector in Full HD at 60 Hz by screen mirroring and the smartphone is charged at the same time. The model was built by Favi in 2014 and is no longer current.
