HAPPRUN JQ818B

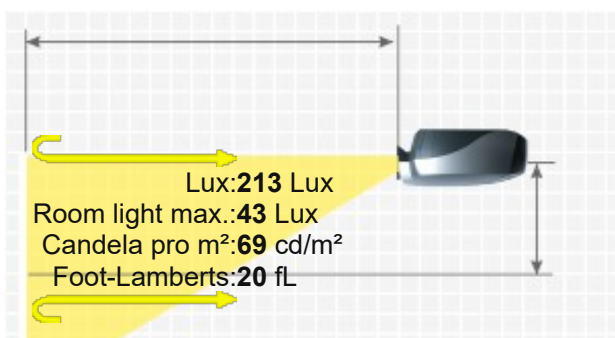

The HAPPRUN model JQ818B is an LCD LED projector with HDTV 1920 x 1080 resolution and a contrast of 10000:1. Manufacturer HAPPRUN specifies a service life of 100,000 hours, which is equivalent to over 68.5 years at 4 hours per day. The projector also offers an integrated media player that can be used to play files directly. As the projector has horizontal and vertical keystone correction, the projector can be set up with plenty of free space in the room. The projector will be able to illuminate a picture width of 223 cm well. However, if there is room light, the picture width should ideally not exceed 149 cm. The rechargeable projector is not dependent on a direct power source and can therefore be set up very quickly, freely and spontaneously. As the projector recognizes Airplay and Miracast screen mirroring signals, it is possible to play videos with high resolution and surround sound directly from a smartphone, tablet or PC (Android, Windows and iOS) via WLAN. Another extra is that the Bluetooth function allows the projector to be connected to external wireless speakers. Video signals 1080P and 4K (compressed) are also no problem for the projector.
