

HAPPRUN T6

HAPPRUN T6

Brief Introduction

Beta 2.5

The HAPPRUN model T6 is an LCD LED projector with HDTV 1920 x 1080 resolution and a contrast of 10000:1. The manufacturer HAPPRUN specifies a service life of 60,000 hours, which is over 41.1 years if enjoyed for four hours a day. The projector also offers an integrated media player that can be used to play files directly. Thanks to the horizontal and vertical keystone correction, the projector can be positioned very freely. 300 Ansi lumens ensure that a picture width of 176 cm is also possible. However, if room light is available, the picture should be a maximum of 117 cm wide. The rechargeable projector is not dependent on a direct power source and can therefore be set up very quickly, freely and spontaneously. The model optionally recognizes Airplay, Miracast Screen Mirroring signals, so it is possible to play videos with high resolution and surround sound directly via WLAN from a smartphone, tablet or PC (Android, Windows and iOS). In addition, the Bluetooth option is a useful addition to the projector, especially for wireless audio transmission. Playback of 1080P is also no problem for the projector.
