

InFocus INL144UST

INFOCUS INL144UST

The InFocus model INL144UST is a DLP laser projector with XGA 1024 x 768 resolution and a contrast of 100000:1. Thanks to the laser technology, the projector has a light life of up to 30,000 hours, which is over 20.5 years if enjoyed for four hours a day. Including an integrated media player with which files can be played directly. As the projector has horizontal and vertical keystone correction, the projector can be set up with plenty of free space in the room. With a projection ratio of just 0.33:1, this projector never gets in the way. For a 2m wide image, the projector only needs to be 66 cm away from the screen. It is also Full HD 1080P and 3D compatible. It was launched in 2019 and is no longer offered by the manufacturer InFocus.

Brief Introduction

Beta 2.5

Display Type

1 x 0,55" DLP Chip
XGA 4/3 Ti Digital Light Processing Chip

Ansi-Lumen
