

InFocus INL4128

INFOCUS INL4128

The INL4128 3D DLP projector from InFocus has 5600 Ansi-Lumen, a contrast of 2000000:1 and a HDTV 1920 x 1080 resolution. Including a lens shift and keystone correction function, which provides freedom during installation. The model offers a microphone jack plug and 10W speakers, so no additional audio devices are required for presentations or training courses. An image width of up to 760 cm is possible as the projector has 5600 Ansi lumens. The projector creates rooms with residual light with a smaller image width, we recommend a maximum of 507 cm. Furthermore, the projector can play 1080P and 4K (compressed) as well as 3D without any problems, and therefore all currently available Blu-ray formats can be recognized by the projector. At 30 decibels, the projector is very quiet compared to other projectors.
