

JOWLURK A8

JOWLURK A8

The A8 LED LCD has 900 ANSI lumens, a contrast ratio of 15,000:1 and an HDTV 1920 x 1080 resolution. The manufacturer states an LED lifespan of 65,000 hours, which is over 44.5 years of four hours of use per day. Since JOWLURK indicates the brightness of the projector in lumens, we have calculated an approximate Ansi-Lumen value in this case. 900 Ansi-Lumen ensure that an image width of 305 cm is also possible. However, if room lighting is available, the image should not exceed 203 cm in width. The projector has Airplay, Miracast Screen Mirroring support, which allows high-resolution video and surround sound to be played directly from smartphones, tablets and PCs running Android, Windows or iOS via Wi-Fi. In addition, the Bluetooth option is a useful addition to the projector, especially for wireless audio transmission. Video signals 1080P and 4K (compressed) are also no problem for the projector.
