The JVC DLA HD11K/L DILA projector has 600 Ansi lumens, a contrast of 2500:1 and an HDTV 1920 x 1080 resolution. The built-in lens shift function provides freedom when setting up. 249 cm picture width, the projector will be able to illuminate well. However, if room light is available, the image width should ideally not exceed 166 cm. Even 1080P video signals are no problem for the projector. The operating noise of just 27 decibels makes the projection quiet. It was launched in 2006 and is no longer offered by the manufacturer JVC. Unfortunately, we can no longer offer a replacement lamp for this model, neither original nor replica.
