KODAK DP850 *Ultra* Digital Projector

Captivate audiences wherever you go. Choose the ultra-lightweight, ultra-portable digital projector specially designed to incorporate your digital images. At just under 4.5 kg, the KODAK DP850 *Ultra* Digital Projector goes wherever you and your laptop go. Across the hall. Across town. Across the country. The DP850 is a small projector loaded with big-projector features. It gives you film-like video, plus crisp saturated images and color from your computer. You get brightness, high-performance sound, a power zoom that you can control remotely, plus worry-free durability. The DP850 comes with a handy shoulder-strap carrying case that protects your projector and goes anywhere you do.

FEATURES / BENEFITS

• Ultra-Convenient

You're on the road, sharing what you know. The DP850 *Ultra* can help. Designed for maximum portability, the DP850 is just under 4.5 kg. Its extra-small footprint, about the same size as most laptops, gives you plenty of room on your set-up table. The soft-sided carrying case makes it easy to take the DP850 wherever you and your laptop go. With color-coded cables and auto-synching, you can set up for a presentation in minutes, not hours. Travelling internationally? The DP850 is built for multi-voltage operation — no need for a voltage converter.

• Ultra-Bright

Designed for use in ambient light conditions, the DP850 delivers SVGA (800 x 600) resolution. The 450 ANSI lumen light image gives you clear, easy-to-read text and images. Furthermore, the DP850's 2,000-hour cool-running lamp means you could run this projector 4 hours a day, 5 days a week for nearly two years before changing the lamp.

• Quality Digital Images

To give you true-to-life images and outstanding color and quality, the DP850 uses award-winning Digital Light Processing (DLP) technology. Video images have the look of film. Stills and slides from your computer feature rich, natural fully-saturated colors.

• 1.5x Power Zoom

No more adjusting the size of your image by moving the projector forward or back. With the DP850's power zoom, you can enlarge or reduce your projected image with a touch-pad at the projector or with the remote. It's designed with presentations in mind.

• Critical Color Management

The DP850 was created to give you the best possible image, regardless of your presentation environment. The powerful color manager gives you three projection modes: one for high ambient light, one for darkened environments, and one for those who like an extra kick to the color.

• Powerful, Interactive Remote Control/Remote Mouse

Once your projector is plugged in, the remote control lets you do the rest. Use the projector's multi-functional infrared remote control, which is included, to control a computer during a presentation, in place of a mouse. With the touch of a button, turn the remote into a pointing device.

• TV Tuner

Connect directly to broadcast signals from a cable or satellite receiver wherever you may be in the world. The DP850 has an available snap-in TV tuner that lets you project the latest news, sports, weather, and programming up on the big screen.

• Super Sound

A true multi-media projector, the DP850 features a high-performance 10-watt loudspeaker with an optional connection to your external sound system. Multiple-channel input allows you to switch signal input devices without plugging and unplugging cables.

• Digital Camera Option

Choose the DP850 Presentation Kit and you'll also receive a KODAK DIGITAL SCIENCE DC210 Zoom Camera. This easy-to-use camera lets you quickly and easily capture digital images and insert them into your laptop presentation files. Or, plug the camera directly into your projector for a pictures-only slide show.

• Intuitive Menu System

Like the KODAK DIGITAL SCIENCE Cameras and Picture Easy software, the DP850 features an easy-to-use menu system. All functions of the projector can be controlled with a click of your mouse. So there's no need for you to learn how to manually adjust basic projection controls such as color, contrast, and focus.

• Easy To Maintain

The DP850 is also easy to maintain, which means virtually no downtime for you or the projector. So service calls are rare.

KODAK DP850 *Ultra* Digital Projector

SPECIFICATIONS

Weight	4.5 kg (9.9 lbs)	Uniformity	85% image center-to-corner
Color Palette	16.7 million colors (24-bit)	Image configuration	Plug-and-project auto image positioning, auto tracking and auto synchronization
Resolution	SVGA (800 x 600) with compression for XGA (1024 x 768) digital images	Audio System	Built-in 10 W loudspeaker
Display	Single-chip DLP	Inputs	Full digital connectivity <ul style="list-style-type: none"> • Computer (EVC plug) • S-video (MiniDIN/4pin) • Composite video (RCA) • Stereo Audio L/R (RCA) • RS232 connectivity
