The Liesegang model ddv 810 is a DLP projector with SVGA 800 x 600 resolution and a contrast of 150:1. An image width of up to 195 cm is possible. However, the image should be smaller in room light. We recommend max. 130 cm. The model was built by Liesegang in 1996 and is no longer current. It should also be noted that there are unfortunately no more replacement lamps for the projector, neither originals nor replicas.
