MAGCUBIC M7

A brief introduction to the Magcubic M7. The standard portable LCD LED projector has an HDTV 1920 x 1080 resolution and a contrast of 15000:1. Due to the LEDs, the projector is specified with a light life of 55000 hours, which converts to over 37.7 years at 4 hours. An image width of up to 176 cm is possible as the projector has 300 Ansi lumens. However, if there is room light, the picture should be max. 117 cm wide. The model recognizes DLNA, Airplay, Miracast Screen Mirroring signals, so it is possible to play videos with high resolution and surround sound directly via WLAN from a smartphone, tablet or PC (Android, Windows and iOS). Playback of 1080P and 4K (compressed) is also no problem for the projector.
