Brief Introduction Beta 2.5	The H79 DLP has 1000 Ansi lumens, a contrast of 4500:1 and an HDTV 1280 x 720 resolution. The built-in lens shift and keystone correction function provides freedom when setting up. 321 cm image width, the projector will be able to illuminate well. However, if room light is available, the picture width should ideally not exceed 214 cm. The operating noise of only 23 decibels makes the projection quiet. It was launched in 2005 and is no longer offered by the manufacturer Optoma.
