

Optoma HD143X

OPTOMA HD143X

The Optoma HD143X 3D DLP projector has 3000 Ansi lumens, a contrast of 23000:1 and an HDTV 1920 x 1080 resolution. The service life of the lamp is up to 15,000 hours, which is equivalent to over 20.5 years at 2 hours per day. A picture width of up to 556 cm is possible. However, the picture should be smaller in room light. We recommend max. 371 cm. A smartphone with MHL connection can be connected directly to the MHL/HDMI port and transmit a 1080p / 60 Hz image mirroring (screen mirroring) while the smartphone is being charged at the same time. Playing 1080P and 3D is also no problem for the projector. At 25 decibels, the projector is very quiet compared to other projectors. This model is no longer offered by Optoma, but is still very popular in our projector database.
