

Optoma PKA31

OPTOMA PKA31

The Optoma model PKA31 is a DLP LED projector with WVGA 854 x 480 resolution and a contrast of 2000:1. The lifespan of the LEDs is 20000 hours, which is equivalent to over 13.7 years at 4 hours per day. The integrated media player can play files directly. The rechargeable projector is not dependent on a direct power source and can therefore be set up very quickly, freely and spontaneously. On the market since 2012, the model is no longer offered by the manufacturer Optoma, but is still very popular in our projector database.
