

# Panasonic PT L200U

PANASONIC PT L200U

The Panasonic model PT L200U is an LCD projector with WVGA 858 x 484 resolution and a contrast of 800:1. The projector is equipped with an integrated media player, so direct playback of files will not be a problem. The projector can illuminate a picture width of up to 287 cm thanks to its 800 Ansi lumens. In room light, however, the picture width should ideally be less than 191 cm. The operating noise of just 28 decibels makes the projection quiet. The model was built by Panasonic in 2003 and is no longer current. It should also be noted that, unfortunately, there are no longer any replacement lamps for the projector, neither originals nor replicas.
