A brief introduction to the A5: The Polaring Laser LCD projector offers 2,200 ANSI lumens, a contrast ratio of 15,000:1 and an HDTV resolution of 1,920 x 1,080. Thanks to its laser technology, the projector has a light source lifespan of up to 30,000 hours, which equates to over 20. 5 years at 4 hours? use per day. Thanks to horizontal and vertical keystone correction, the projector can be positioned with great flexibility. 2,200 ANSI lumens ensure that an image width of up to 278 cm is possible. However, if there is ambient light in the room, the image should be no more than 185 cm wide. Google TV transforms the projector into a versatile media hub, which can be seamlessly integrated into a smart home. As the projector recognises AirPlay and Miracast screen mirroring signals, it is possible to play videos directly from a smartphone, tablet or PC (Android, Windows and iOS) via Wi-Fi in high resolution with surround sound. In addition, the Bluetooth capability is a useful addition to the projector, particularly for wireless audio transmission. It is also compatible with Full HD 1080p and 4K (compressed). With an operating noise level of just 28 decibels, this model is very quiet compared to others.
