The AK-69 LED LCD has 350 Ansi lumens, a contrast of 10000:1 and an HDTV 1920 x 1080 resolution. The manufacturer specifies an LED service life of 55,000 hours, which is over 37.7 years if enjoyed for four hours a day. An image width of up to 190 cm is possible as the projector has 350 Ansi lumens. However, if room light is available, the picture should be max. 127 cm wide. The model recognizes Airplay, Miracast Screen Mirroring signals, so it is possible to play videos with high resolution and surround sound directly via WLAN from a smartphone, tablet or PC (Android, Windows and iOS). Thanks to the Bluetooth function, the projector can also be flexibly paired with other speakers. Even 1080P video signals are no problem for the projector.
