Operating Noise

A brief introduction to the Sharp DT 300 (USA). The DLP projector has a WPAL 1024 x 576 resolution and a contrast of 2000:1. The lamp life is specified by the manufacturer as 5000 hours, which is over 6.8 years if enjoyed for two hours a day. Includes a lens shift and keystone correction function, which provides freedom during installation. The projector can illuminate an image width of up to 287 cm thanks to its 800 Ansi lumens. In room lighting, however, the picture width should ideally be less than 191 cm. The operating noise of just 29 decibels makes the projection quiet. The model was built by Sharp in 2003 and is no longer current.
