Status Data

The Sharp XG 3780E/U stationary LCD projector has 522 Ansi lumens, a contrast of 100:1 and a VGA 640 x 480 resolution. As Sharp specifies the brightness of the projector in lumens, we have calculated an approximate Ansi lumen value in this case. The projector can illuminate a screen width of up to 199 cm well with its 522 Ansi lumens. In room lighting, however, the picture width should ideally be less than 133 cm. It is no longer offered by the manufacturer Sharp. It should also be noted that there are unfortunately no longer any replacement lamps available for the projector, neither originals nor replicas.

1 x 6,4" LCD TFT Panel
VGA 4/3 Liquid Crystal Display
