

SIM2 UltraNero4 25-28

SIM2 ULTRANERO4 25-28

The high-end home cinema SIM2 UltraNero4 25-28 3D Laser DLP projector has 7000 ANSI lumens and a UHD (4K2K) 3840 x 2160 resolution. Thanks to laser technology, the projector has a light life of up to 20,000 hours, which is over 13.7 years when used for four hours a day. The lens shift function allows the projector to be positioned very freely. An image width of up to 850 cm is possible; if the image width is smaller (we recommend max. 567 cm), even rooms with residual light are no problem. The projector can also handle 1080P and 4K video signals as well as 3D, meaning that it can recognize all currently available Blu-ray formats. At only 29 decibels, the projector is very quiet in operation.
