

Soundcore Nebula Capsule 3

SOUND CORE NEBULA CAPSULE 3

Brief Introduction

Beta 2.5

The Game-Portable Soundcore Nebula Capsule 3 Laser DLP projector has 200 ANSI lumens, a contrast ratio of 400:1, and HDTV 1920 x 1080 resolution. The manufacturer specifies a laser lifetime of 30,000 hours, which equates to over 20.5 years of enjoyment at four hours per day. A built-in horizontal and vertical keystone correction provides freedom when setting up the projector. An image width of up to 144 cm is possible. However, the image should be smaller in room lighting. We recommend a maximum of 96 cm. The built-in 17100 mAh battery (2.5 hours) means that no power supply is required, allowing the projector to be set up quickly and flexibly. Google TV turns the projector into a smart entertainment center with countless functions. The model recognizes Chromecast and screen mirroring signals, making it possible to play high-resolution videos with surround sound directly via Wi-Fi from a smartphone, tablet, or PC (Android, Windows, and iOS). In addition, thanks to the Bluetooth function, the projector can be flexibly paired with other speakers. Even 1080P video signals are no problem for the projector. At just 28 decibels, the device is one of the quieter projectors available.
