VIEWSONIC M1 MAX

The M1 Max LED DLP projector from Viewsonic has 500 ANSI lumens, a contrast ratio of 120000:1, and HDTV 1920 x 1080 resolution. The manufacturer specifies an LED lifespan of 60,000 hours, which equates to over 41.1 years of enjoyment at four hours per day. The ambient light sensor allows the projector to automatically optimize the projected image. The projector also offers an integrated media player that allows files to be played directly. Since the projector has horizontal and vertical keystone correction, it can be set up with plenty of space in the room. An image width of up to 227 cm is possible. However, the image should be smaller when the room is lit. We recommend a maximum of 151 cm. Thanks to the built-in 12000mAh (4000mAh 3.7Vx3) (1.5hrs@Normal, 2hrs@Eco) battery, no power supply is required, allowing the projector to be set up quickly and flexibly. Google TV turns the projector into a versatile media hub that can be seamlessly integrated into a smart home. The projector has Airplay and Miracast screen mirroring support, which allows high-resolution videos and surround sound to be played directly from smartphones, tablets, and PCs with Android, Windows, or iOS via Wi-Fi. In addition, the Bluetooth function allows the projector to be flexibly paired with other speakers. The projector can also play 1080P without any problems and even has the option of projecting HD 1080P Blu-rays onto the ceiling thanks to its 360° projection. The operating noise of only 26 decibels makes the projection quiet.
