

XNANO HA109

XNANO HA109

The HA109 LED LCD has 160 ANSI lumens, a contrast ratio of 1000:1, and an HDTV resolution of 1280 x 720. Thanks to the LEDs, the projector has a light source lifespan of up to 30,000 hours, which equates to over 20.5 years at 4 hours per day. Thanks to horizontal and vertical keystone correction, the projector can be positioned with great flexibility. An image width of up to 110 cm is possible. However, in bright room conditions, the image should be set smaller. We recommend a maximum of 73 cm. The projector supports DLNA and Screen Mirroring, allowing you to stream high-resolution videos and surround sound directly from smartphones, tablets, and PCs running Android, Windows, or iOS via Wi-Fi. Another notable feature is that the projector can be connected to external wireless speakers via Bluetooth. The projector also handles 1080p playback with ease.
