The T1 Pro LED LCD has 450 ANSI lumens and HDTV 1920 x 1080 resolution. It is an LED projector with a light life of 30,000 hours, which is over 20.5 years when used for four hours a day. The projector can illuminate images up to 216 cm wide thanks to its 450 ANSI lumens. However, in room lighting, the image width should ideally be less than 144 cm. Google TV turns the projector into a smart entertainment center with countless functions. The model recognizes Airplay and Miracast screen mirroring signals, making it possible to play high-resolution videos with surround sound directly via Wi-Fi from a smartphone, tablet, or PC (Android, Windows, and iOS). In addition, the Bluetooth capability is a useful addition to the projector, especially for wireless audio transmission. Furthermore, the projector can play 1080P without any problems.
